

Hey Pablo,

Not every sprint hits the mark — what matters is what you do next.

Your team slipped below the **60% roadmap delivery goal**, which pulled your **maturity score down by 0.8**, now at **4.7/10**.

Let’s course-correct with a few focused moves:

1. Refocus on What Matters

- 🎯 Off-roadmap work is pulling attention.
- 📌 Check epic STX-714. If it’s not clearly tied to roadmap priorities, consider deferring or replacing it.

2. Control Scope Before It Controls You

- 📦 STX-698 and STX-707 have grown by **+37%** in scope.
- 📌 Time to groom — cut or clarify anything that doesn’t directly contribute to the goal.

3. Tighten Sprint Entry Criteria

- ⌚ Story duration has crept from **4.4 to 5.1 days**.
- 📌 Double down on your grooming process. Uncertainty or complexity should be resolved before tickets hit the board.

Which one will you tackle first?
